# INFLATING SUGGESTIONS

## HOW TO INFLATE YOUR MOKI TUBE

1. Roll out your Moki inflatable board on the ground
2. Set up the pump
3. Unscrew the valve cover located on the tail of the board
4. Push and turn the valve head up before inflate
5. Attach and screw the pump onto the valve
6. Secure the pump placing your feet on the pegs and start pumping

## HOW TO DEFLATE YOUR MOKI TUBE

1. Unscrew the valve cover.
2. Push down the valve head and turn. The air will be quickly released.
3. Roll up the board starting from the nose.
4. Leave the fin outside.

## FINS ON BOARD

Your board has the removable fins system:

us box for the central fins and future fin system for the side fins.

1. First insert the back of the fin into the open section you can find in the middle of fin box
2. Move the fin towards the back of the box.
3. Insert the square nut into the fin box.
4. Slide the square nut towards to the nose of the fin box
5. Line up the hole of the square nut with the fin hole the screw by hand

## STORING THE BOARD

1. Don't leave the board long time under direct sun light.
2. Store the board inside the sup bag when not in use.
3. If planning on leave the board unused for long time, we suggest to unroll it.

## WARNING

This product is not a life saving device.

Ankle leash recommended (not included).

Comply to local water safety rules and boating regulations.

Make a float plan: prepare and share your itinerary with other people.

Use inflating recommended pressure **15 PSI**.

You will reach 10 PSI in about 2\3 minutes (+/-), and little more effort will get you to 15 PSI (on hot days the air inside expands).
